DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to "... a portable medical device means providing medication storing means, a medication accessing means, a dispensed medication counting means and medical device wave energy communicating means," classified in class 604, subclass 131.
- II. Claims 10-16, drawn to "...a portable medical device means providing a medical state sensing means, a medical state value recording means, and a medical device wave energy communicating means," classified in class 600, subclass 300.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as it can be used without a medication storing, accessing, and dispensing means. Invention II discloses only a means of medical state sensing and value recording. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
